

ONLY USED FOR ANIMAL HEALTH

BRUDOLL GENÇ-A
Injectable

INJECTABLE SUSPENSION LYOPHILIZATE

LYOPHILIZED BRUCELLA ABORTUS S19 VACCINE

BRUDOLL-AGeç is a *Brucella abortus* S 19 vaccine prepared against brucellosis of cattle

PHARMACEUTICAL FORM:

Vaccine consisting of lyophilized Attenuated *Brucella abortus* S 19 strain pellet and dilution buffer.

COMPOSITION:

One dose of vaccine (1 ml);

Attenuated <i>Brucella abortus</i> S 19	40-120 x 10 ⁹ CFU/dose
Enzymatic digest of Proteins / Casein	0,125 mg/dose
Sukroz	0,25 mg/dose
Sodyum glutamate	0,05 mg/dose
HEPES	0,01 mmol/dose

INDICATIONS:

It is applied for 3-6 months old female calves for protective purposes against brucellosis.

CONTRAINDICATIONS:

It is not used in males and animals older than 6 months.

ADVERSE EFFECTS:

Small stiff nodules that can sometimes be seen at the injection area and a temporary rise in body temperature are considered as normal vaccine reactions.

TARGET SPECIES:

3-6 months old female calves

METHOD OF ADMINISTRATION AND DOSE:

The lyophilized vaccine is homogenized with 3-4 ml of diluent drawn into a sterile syringe and it is added to the diluent with the same syringe, mixed and made ready for administration. The mixing process of the vaccine vial should be repeated until the vaccination is concluded. It is administered to 3-6 month old female calves as 1 ml subcutaneous from the left side of the neck. A separate needle should be used for each animal in vaccination. It is not used in males and animals older than 6 months.

WARNINGS:

The diluted vaccine should be used within 6 hours, as maximum. Vaccines exposed to high temperatures and sunlight should not be used. Animals to be vaccinated should be healthy.

Asepsis and antisepsis should be taken into consideration in vaccine administrations.

BRUDOLL-A Genç should be applied only by veterinarians or veterinary technicians under the supervision of a veterinarians.

ONLY USED FOR ANIMAL HEALTH

BRUDOLL GENÇ-A
Injectable

INJECTABLE SUSPENSION LYOPHILIZATE
